The focus of the Chemical Management Program Area is emergency planning, community right-to-know, and reporting of substances and processes at facilities which may pose a threat. This area does not solely apply to manufacturers or large federal facilities. Chemicals include liquids, solids, and gaseous substances. A substance as common as "white-out" or a household pesticide/herbicide are ...

The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...

Carbon dioxide (chemical formula  $\text{CO}_2$ ) is a colorless gas with a density about 60% higher than that of dry air. Carbon dioxide consists of a carbon atom covalently double bonded to two oxygen atoms. It occurs naturally in Earth's atmosphere as a trace gas. The current concentration is about 0.04% (410 ppm) by volume, having risen from pre-industrial levels of 280 ppm.
