In astronomy, the geocentric model (also known as geocentrism, or specifically the Ptolemaic system) is a superseded description of the Universe with Earth at the center. Under the geocentric model, the Sun, Moon, stars, and planets all orbited Earth. The geocentric model was the predominant description of the cosmos in many ancient civilizations, such as those of Aristotle and Ptolemy.

Here's a look at usage during the last 20 years: As evidenced, unregister received a substantial boost shortly after the dot-com boom/bust of the late 90s, while deregister usage has been more or less the same throughout. It's worth noting that neither word is defined by any major dictionary, although some lesser dictionaries include the two.

Drawing a model in 3D is different from drawing an image in 2D. This introduction to drawing basics and concepts explains a few ways you can create edges and faces (the basic entities of any SketchUp model). You also discover how the SketchUp inference engine helps you place those lines and faces on your desired axis.

Whether or not "performant" is actually a real word has been debated for some time.. It does not appear in the dictionary, nor does Google definitions include it. While it has been used before and appears in wiktionary, I would tend to avoid using it until the word becomes, well...a word.. Is there any reason you could not use one of the following instead?

### meaning - What is wrong with the word "performant ...

The Universe is all of space and time and their contents, including planets, stars, galaxies, and all other forms of matter and energy. While the spatial size of the entire Universe is unknown, it is possible to measure the size of the observable universe, which is currently estimated to be 93 billion light years in diameter. In various multiverse hypotheses, a universe is one of many causally ...
