Digestion can be categorized as either (2) or (3) .

CHAPTER 35 Study Guide The Digestive System

Page 1. Endocrine System Review. Consists of discrete individual glands that produce and secrete chemical messengers known as hormones. Hormones travel from endocrine organs to their targets via the blood. Target cells are cells that have receptors for specific hormones on them.

Endocrine System Review - interactivephysiology.com

When working properly, your endocrine glands secrete hormones into your blood. The hormones are then carried throughout your body. When the correct amount of a hormone reaches its target tissue, it causes certain reactions in that organ or tissue. But sometimes, too much or too little hormone is released.
