Infantile hemangiomas (IHs) are the most common tumors of childhood. Unlike other tumors, they have the unique ability to involute after proliferation, often leading primary care providers to assume they will resolve without intervention or consequence. Unfortunately, a subset of IHs rapidly develop complications, resulting in pain, functional impairment, or permanent disfigurement.

A cactus (plural: cacti, cactuses, or less commonly, cactus) is a member of the plant family Cactaceae, a family comprising about 127 genera with some 1750 known species of the order

Caryophyllales. The word "cactus" derives, through Latin, from the Ancient Greek κάκτος, kaktos, a name originally used by Theophrastus for a spiny plant whose identity is not certain.

Chapter One. Pacing restlessly up and down the sidewalk, I studied the building. It reminded me of a high school, the type built back in the late fifties or early sixties; designed by engineers not architects, long and rectangular, two floors, dirty windows with wire-reinforced glass, concrete block, and an aura of age, depression - a building forgotten by time.
