Urination is the release of urine from the urinary bladder through the urethra to the outside of the body. It is the urinary system's form of excretion. It is also known medically as micturition, voiding, uresis, or, rarely, emiction, and known colloquially by various names including peeing, weeing, and pissing.. In healthy humans (and many other animals) the process of urination is under ...

While no single factor is responsible for the recent, dramatic increases in overweight and obesity, a scientific consensus has emerged suggesting that consumption of sugar-sweetened products, especially beverages, is casually linked to increases in risk of chronic, debilitating diseases including type 2 diabetes, cardiovascular disease, hypertension and stroke.

Artificial sweeteners are not the answer to childhood obesity

Key West, Florida. Some of the nation's leading journalists gathered in Key West, Fla., in May 2008 for the Pew Forum's biannual Faith Angle Conference on religion, politics and public life.. Recent advances in neuroscience and brain-imaging technology have offered researchers a look into the physiology of religious experiences.
