- Lever Rule and therefore, % = +. The phase whose percent you're calculating is simply the one which you are going away from for the line segment in the numerator; for example, D2 is going from the point of interest to the vapor phase, so if D2 is in the numerator then you're calculating percent of liquid.. Txy diagrams have entirely analogous rules, but just be aware that the graph is ...

Chapter 1 Introduction to Process Optimization

Geotechnical engineering is the branch of civil engineering concerned with the engineering behavior of earth materials. Geotechnical engineering is important in civil engineering, but also has applications in military, mining, petroleum and other engineering disciplines that are concerned with construction occurring on the surface or within the ground.

by: Don W. Green, Robert H. Perry Abstract: The definitive reference for more than half a century,—updated for the first time in more than a decade. Since 1934, Perry's Chemical Engineer's Handbook has delivered unrivaled, state-of-the-art coverage of all aspects of chemical engineering—from the fundamentals to details on computer applications and control.
