"Every Rock Has A Story" Rocks are composed of chemical compounds naturally occurring in nature. Rocks are composed of particles ranging from microscopic grains to full sized crystals and crystal grains of different kinds of minerals, and containing many different identifiable physical characteristics. It is conceptually important that each rock has an origin in concepts of place, time, and ...

With more than 90 high-quality associate degree and certificate programs, Erie Community College continues to be the number one choice of area high school students. ECC, with three convenient campus locations, offers flexible educational options, including full and part-time instruction, day, evening, weekend and online classes. And ECC offers the lowest cost per credit hour, making it the ...

Course Descriptions - Erie Community College - Acalog ACMS™

The geology of Mercury is the least understood of all the terrestrial planets in the Solar System. This stems largely from Mercury's proximity to the Sun which makes reaching it with spacecraft technically challenging and Earth-based observations difficult.. Mercury's surface is dominated by impact craters, basaltic rock and smooth plains, many of them a result of flood volcanism, similar in ...

Oil South England - Introduction

Some common isotopes used for radioisotopic dating .. 7.2.2 Radioisotopic Dating Mass spectrometer instrument. For a given a sample of rock, how is the dating procedure carried out? The parent and daughter isotopes are separated out of the mineral using chemical extraction. In the case of uranium, ^{238}U and ^{235}U isotopes are separated out together, as are the ^{206}Pb and ^{207}Pb with an ...

7 Geologic Time - An Introduction to Geology

This series shows the physical processes and human activities that shape our planet. From earthquakes and volcanoes to the creation of sea-floor crusts and shifting river courses, Earth Revealed offers stunning visuals that explain plate tectonics and other geologic concepts and principles. Follow geologists in the field as they explore the primal forces of the Earth.
