Ab initio quantum chemistry methods are computational chemistry methods based on quantum chemistry. The term ab initio was first used in quantum chemistry by Robert Parr and coworkers, including David Craig in a semiempirical study on the excited states of benzene. The background is described by Parr. Ab initio means "from first principles" or "from the beginning", implying that the only ...

The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...

1. Introduction. Even in this digital era one of the world major problems is the shortage of electricity. This is because of the present lighting system, which includes tungsten filament bulbs which consume more power, fluorescent lamps, which are not eco-friendly as they are excited by mercury, which is harmful, non-disposable, life time is only of the order 1000 h.
