The success of peritoneal dialysis as renal-replacement therapy depends on a well-functioning peritoneal catheter. Knowledge of best practices in catheter insertion can minimize the risk of catheter complications that lead to peritoneal dialysis failure.

Peritoneal Dialysis Catheter Insertion - ScienceDirect

Introduction to Vascular Closure Devices. Sven Ivar Seldinger introduced the peripheral arterial access technique in 1959. 1 With the subsequent introduction of arterial access sheaths in 1980s, repeated and larger vascular access with minimal trauma became a possibility. 2 Since then, the growth in the spectrum and volume of endovascular therapy has been dramatic.

Acute pancreatitis (AP) is one of the most common diseases of the gastrointestinal tract, leading to tremendous emotional, physical, and financial human burden (1, 2). In the United States, in 2009, AP was the most common gastroenterology discharge diagnosis with a cost of 2.6 billion dollars (). Recent studies show the incidence of AP varies between 4.9 and 73.4 cases per 100,000 worldwide (3, 4).

Renografin-60 (Diatrizoate Meglumine and Diatrizoate Sodium Injection USP) is a radiopaque contrast agent supplied as a sterile, aqueous solution.

Renografin-60 - FDA prescribing information, side effects ...

Catheter-associated urinary tract infections (CAUTIs) are widely recognized as the most common healthcare-associated infection (HAI) in the acute care hospital setting. Microbial colonization occurs within five to seven days of catheter placement and is frequently associated with the development of a bacterial biofilm, presumably the source of the CAUTI.
