Electrical and Electronics Engineering involves designing, controlling and maintaining the electrical equipments. Some of the project areas of electrical field are power generation, power system equipment maintenance and handling, industrial control and robotics, power electronics and energy systems. Therefore, this article gives a brief explanation of top 10 innovative electrical projects for ...

The daily routine work of an elevator can be called simply the daily traffic patterns of an elevator. Fig.1 illustrates a possible traffic pattern and shows the number of up landing calls and down landing calls registered during the working day in a fixed time company where employers must start and leave the work in predetermined time, these daily traffic patterns can be divided to:

Frank C. Park received his BS in electrical engineering from MIT and his PhD in applied mathematics from Harvard University. From 1991 to 1995 he was assistant professor of mechanical and aerospace engineering at the University of California, Irvine. Since 1995 he has been professor of mechanical and aerospace engineering at Seoul National University, where he is currently chair of the department.

Systems engineering is an interdisciplinary field of engineering and engineering management that focuses on how to design and manage complex systems over their life cycles. At its core, systems engineering utilizes systems thinking principles to organize this body of knowledge. The individual outcome of such efforts, an engineered system, can be defined as a combination of components that work ...
